

2024

The Wave l'Onde

NEWSLETTER JANUARY 2024

Dear CMOS members,

On behalf of CMOS, I would like to wish you a very happy New Year 2024. May it be full of health, success and personal satisfaction in your projects and studies, in the case of our students.

We invite you to take part in the [2024 impact study survey](#).

This survey is part of an initiative to explore how CMOS can have a more significant impact on Canada's atmospheric, oceanographic and environmental landscape, and deliver greater value to its members. This is your chance to have your say on improving CMOS' value proposition. Your participation in this survey is essential, as the results of this initiative will be an important factor in the development of CMOS's next strategic plan.

The Scientific Program Committee (SPC) of the 2024 Congress has received 16 session proposals, on a wide range of interesting and relevant topics such as: extreme weather, coastal oceanography and ocean modeling, climate systems and their global and regional modeling, the Arctic, and artificial intelligence. In addition to these sessions, there will also be 8 general sessions covering our interdisciplinary atmosphere-ocean science, ranging from theoretical research to applied science, and from the sharing and transformation of scientific knowledge into services for society.

As indicated in the January 11 pre-announcement, [the abstract submission window opens shortly \(January 22\) and closes on February 15](#). You'll find more and more details on the dedicated web page on the CMOS website and on the congress website in the coming weeks. Please visit their web pages regularly.

We encourage centers to find innovative ways for members to meet during parts of the Congress, which will be virtual, in their respective cities, in a way that fosters both scientific and social interaction.

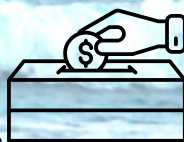

February 15, 2024 is also the deadline for nominations for [peer recognition awards](#). This is an excellent opportunity to recognize the scientific contributions and exemplary dedication of our hard-working colleagues. Be sure to nominate deserving individuals for these awards, and join in the CMOS tradition of highlighting excellence.

MANY THANKS TO ALL THE VOLUNTEERS WHO CONTRIBUTE TO CMOS.

Don't forget to renew your membership, or to become or invite someone to become a CMOS member.
